Protecting Residents Against Infection

The health of our residents is our top concern. Requirements for greater infection control in skilled nursing facilities (SNFs) have been phased in over the last 3 years by the Centers for Medicare and Medicaid Services and outlined an effective infection prevention and control program. This program includes systems to prevent, identify, report, investigate and control infections and communicable diseases for SNF residents and staff. In 2017, SNFs were required to develop an antibiotic stewardship program to combat multi-drug resistant organisms. The final phase was implemented in November 2019 and includes a 19-hour course in infection prevention and control.

Our nursing home has a designated Infection Preventionist (IP) on staff who has completed this training which

includes tools, checklists, signs, policies and procedures for infection prevention.

Some of the many topics our IP is trained on include:

- Infection prevention
- Principles of standard precautions
- Hand hygiene
- Injection safety
- Point-of-care blood testing
- Environmental cleaning
- Linen management
- Preventing respiratory infections
- Tuberculosis prevention

If you have questions regarding infection prevention or the measures we employ, please contact our administrator.

Activity Highlights

We continue to go on outings throughout the year, subject to weather. If you or your loved one is interested in attending outings or have an idea for an outing, please contact Kristin in activities. We do our best to make sure all residents have a chance to attend outings, so we do have to take turns. If you are interested in attending or your loved one wants to attend an outing, please let the activities staff know. Family is welcome to come on outings which also helps us include more residents. Also, please make sure your loved one has appropriate clothing for the weather.

Job Postings

CNAs - All shifts available

Part-Time Dietary Aides - After school hours available for high schoolers!
